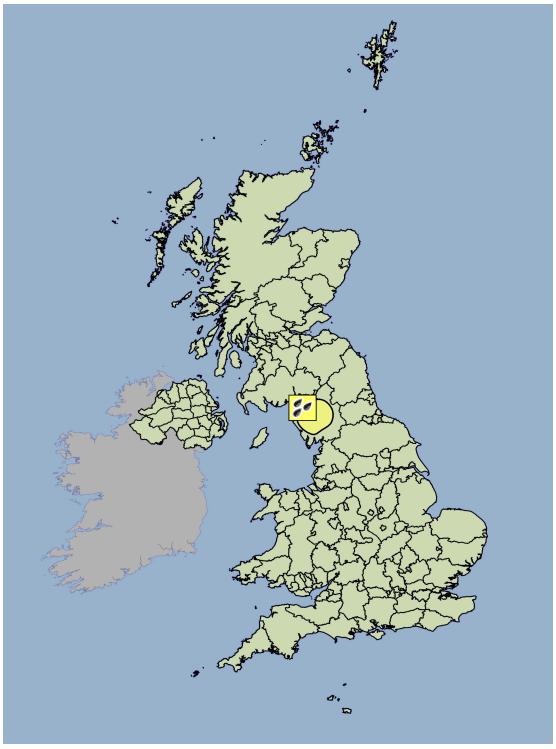
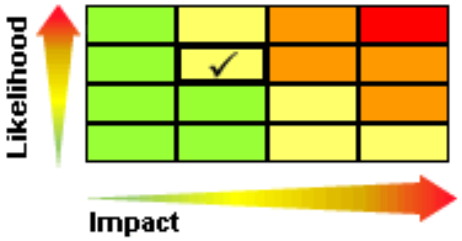
National Severe Weather Warning Service





Chief Forecasters Assessment
Another vigorous depression is expected to track to the north of Scotland later on Friday and into Saturday, bringing a strong, mild and moist southwesterly airstream across the UK. The associated frontal system will bring heavy rain across western parts, this also accompanied by strong winds. Within the warning area accumulations are expected to be widely between 20-40 mm over higher ground, but locally 50-60 mm are possible, leading to localised river flooding.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **15:00 on Fri, 09th Jan 2015** until **09:00 on Sat, 10th Jan 2015**

Heavy and persistent rain is expected to affect some western areas from Friday afternoon into Saturday morning, heaviest over western facing hills. Significant accumulations across Cumbria could lead to localised flooding.

The public should be aware of the risk of minor disruption.
